

# TRENCHING

**TRENCHING SERVICES DESIGNED  
TO HAVE THE LEAST IMPACT.**

Trenching can be achieved by a wide variety of methods, such as a backhoe, excavator, mini excavator, trencher, and air knife. ASTAC uses trenchers which results in the least impactful ground disturbance and is capable of trenching through solid ice as encountered in much of Alaska. ASTAC is the best choice in the market, most importantly we are the ones to fully commit when undertaking any project.
