

BRAND NEW! COMBO TECH TRAINING PROGRAM

PROGRAM OVERVIEW

ASTAC has launched a Combo Technician Training Program based in Utqiagvik, Alaska. This is a progressive 12-month program, providing structured, hands-on, in-field training.

Participants will gain practical experience supporting telecommunications installation, maintenance, and repair of network systems.

Any required training or certifications will be paid for by ASTAC as part of the program.

- Paid, full-time training program
- Support fast, reliable internet service in your community
- Develop in-demand technical skills
- Opportunity for long-term employment based on program completion
- No prior experience required
